### DETAILED ACTION

In the specification, page 5, line 24 "Fig 1" should be --Figs 1a, 1b, 1c-- and on page 7 line 15 "31" should be --13--.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "it" in line 4 lacks a clear antecedent basis rendering the claim indefinite as does "or such" in line 4 since it is unclear what structure is intended by this phrase. Further this claim is indefinite and incomplete since it fails to correlate the movable second element 11 with the movable parts of the tool. Note claims 6, 10 and 20 attempt to provide this correlation.

Regarding claim 6, the phrase "an arrangement" in line 2 renders the claim indefinite since it fails to provide structure. A word similar to --elements-- or --means-- would obviate this deficiency.

Regarding claim 10, the phrase "is arranged" renders the claim indefinite since it fails to provide a particular structural arrangement.

Regarding claim 11, "said second pressure medium cylinder" renders the claim indefinite since no first cylinder is claimed. It appears this claim should depend from claim 7.

Regarding claim 13, the forks should be correlated with "the moving parts" in claim 6. One way of doing this would be to insert a phrase similar to --the moving parts comprising—after "with" in line 2. Also the phrase "arranged to" in line 4 renders the claim indefinite since it provides no specific structural relationship.

Regarding claims 14-17, it is unclear whether the applicant intends to positively claim the forks. Clarification is required. Further claims 15, 16 and 17 call for an interconnection but contain no structure to provide an interconnection and are thus incomplete.

Regarding claim 20, this claim has the same deficiency as claim 6.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7, 8, 9, 10 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dimitriu.

Note the end of the piston rod in cylinder 69 comprises the first element and the end of the piston rod in cylinder 73 comprises the second element. Also notice 18 can be separated from 20 with 20, 19, 73, etc. comprising the tool.
